

Permanent Teeth

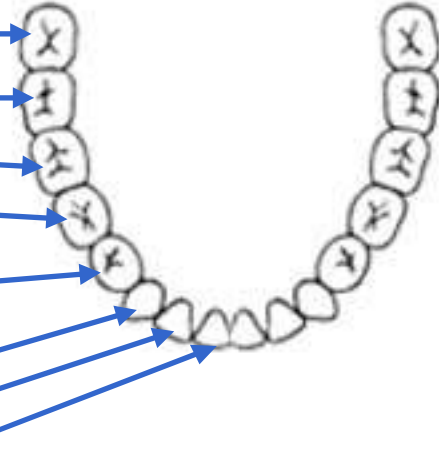

Upper Teeth Erupt

Central incisor	7-8 years	
Lateral incisor	8-9 years	
Canine (cuspid)	11-12 years	
First premolar (first bicuspid)	10-11 years	
Second (second bicuspid)	10-12 years	
First molar	6-7 years	
Second molar	12-13 years	
Third molar (wisdom tooth)	17-21 years	

A diagram of the upper permanent teeth in a curved arch. Blue arrows point from the eruption age ranges in the table to the corresponding teeth in the diagram. The arrows point to the central incisor, lateral incisor, canine, first premolar, second premolar, first molar, second molar, and third molar.

Lower Teeth Erupt

Third molar (wisdom tooth)	17-21 years	
Second molar	11-13 years	
First molar	6-7 years	
Second premolar (second bicuspid)	11-12 years	
First premolar (first bicuspid)	10-12 years	
Canine (cuspid)	9-10 years	
Lateral incisor	7-8 years	
Central incisor	6-7 years	

A diagram of the lower permanent teeth in a curved arch. Blue arrows point from the eruption age ranges in the table to the corresponding teeth in the diagram. The arrows point to the central incisor, lateral incisor, canine, first premolar, second premolar, first molar, second molar, and third molar.
